This Appendix provides a map of each preliminary and alternative location identified in the Deployment Plan. The maps highlight the parcel shapes from publicly available GIS sources that are within a 1-mile service area measured from a decision point along the AFC located at the beginning of the painted gore at each interchange. The highlighted parcel areas represent initial potential charging locations. In a few cases, there are no parcel shapes that meet the criteria. INDOT will continue to explore options at all locations. Additional areas may be identified in future planning phases. No decisions have been made regarding the specific locations of the charging stations. Rather, the purpose of this Appendix is to show initial potential locations based solely on the 1-mile requirement.
